PMI has supported Cambodia to fight malaria since 2013

PMI’s Program in Cambodia

The U.S. President’s Malaria Initiative (PMI) provides vital financial and technical assistance that enables the Government of Cambodia to deploy lifesaving interventions proven to fight malaria.

PMI is a critical funding source for insecticide-treated nets, malaria diagnosis and treatment, vector control, therapeutic efficacy studies, and more. PMI investments also support stronger, more-resilient health systems. For example, PMI helps train health workers, strengthen supply chains, improve data monitoring, and reinforce health policies.

PMI Cambodia’s fiscal year 2022 budget was $10 million. PMI investments support and build on those made by the Government of Cambodia, in coordination with other stakeholders. PMI investments are detailed in the Malaria Operational Plan for Cambodia**, which was developed in consultation with the National Malaria Control Program, other donors, and technical organizations. Planned PMI activities reflect national and PMI strategies, draw on best-available data, and align with the country context and health system.

PMI’S IMPACT ON CAMBODIA’S MALARIA FIGHT

Since partnering with PMI, Cambodia has made progress against malaria. Child death rates have fallen and lifesaving interventions such as mosquito nets are reaching more people. Health systems are stronger and health workers have received more than 10,000 trainings to help them fight malaria.

The U.S. President’s Malaria Initiative (PMI) supports 24 partner countries in sub-Saharan Africa and three programs in the Greater Mekong Subregion in Southeast Asia to control and eliminate malaria. Led by the U.S. Agency for International Development (USAID) and implemented together with the U.S. Centers for Disease Control and Prevention (CDC), PMI delivers cost-effective, lifesaving malaria interventions alongside catalytic technical and operational assistance to equip and empower partner countries to end malaria.
